INAMIGOS FOUNDATION

Website UX/UI & Comprehensive Improvement Analysis Report

Target: inamigosfoundation.org.in
Date: September 2026
Evaluator: Senior UI/UX & Frontend Specialist

Target Organization: InAmigos Foundation (Section 8 Non-Profit)

Location: Bilaspur, Chhattisgarh, India

Founder & CEO: Mr. Govind Shukla

Frameworks Applied: Nielsen Norman Usability, WCAG 2.1 AA, Conversion Optimization

1. Executive Summary

InAmigos Foundation (*"Uniting Minds for Change"*) is a Section 8 non-profit organization established in September 2020. It holds exceptional grassroots credibility with 200+ volunteers across 28 Indian states, having impacted over 50,000 lives across 6 core verticals (Project Seva, Bachpanshala, Jeev, Udaan, Prakriti, and Vikas). The organization also holds top-tier institutional credentials: 80G, 12A, CSR-1, NITI Aayog registration, and IAF ISO 9001:2015 certification.

However, our technical, visual, and behavioral audit of the live website (**https://inamigosfoundation.org.in**) revealed critical barriers that severely dilute user trust, degrade donor conversion, and pose severe search engine blacklisting risks:

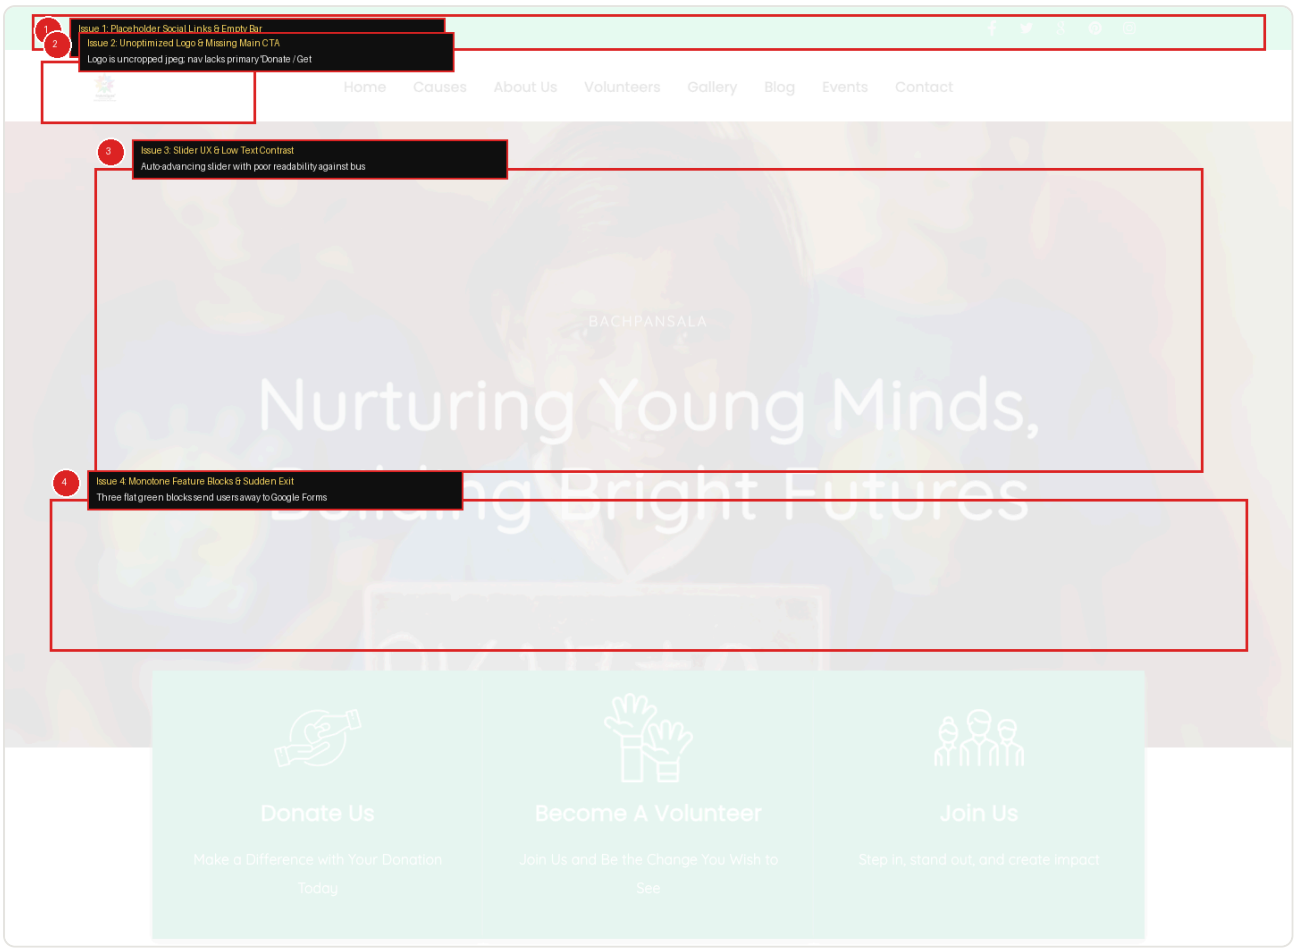

- **Critical Security Threat:** The live public website source contains hidden injected spam/gambling links (`<ul style="display:none"> slot gacor...`), indicating an unpatched CMS/template breach.
- **Empty Homepage Causes:** The homepage's "OUR CAUSES" section contains zero projects, displaying an empty container row.
- **Impenetrable Wall of Text:** The About Us narrative packs 10+ distinct legal, CSR, and initiative facts into a single dense 200-word paragraph.
- **WCAG 2.1 AA Failures:** Primary accent green (`#00CC83`) on white backgrounds achieves only a 2.2:1 contrast ratio, failing legal accessibility norms (minimum 4.5:1).
- **Conversion Friction:** Direct off-site redirection to Google Forms and Razorpay without contextual reassurance or tax deduction advisories.

2. Heuristic Usability Scorecard

Evaluation Dimension	Live Site Score	Benchmark Standard	Audit Summary
Security & SEO Health	**2.0 / 10**	9.5 / 10	Severe risk: Injected spam links in DOM; missing OpenGraph tags.
Content Architecture	**3.5 / 10**	9.0 / 10	Unscannable wall-of-text; empty causes section; dummy email on team card.
Visual Hierarchy & Branding	**4.0 / 10**	8.5 / 10	Dated Bootstrap styling; uncropped logo; jarring neon green blocks.
Accessibility (WCAG 2.1 AA)	**3.5 / 10**	9.0 / 10	Low text contrast (2.2:1); touch targets < 44px; missing ARIA states.
Conversion & Donation UX	**4.0 / 10**	8.5 / 10	Abrupt external links; no persistent navbar CTA; lack of 80G tax benefit guidance.

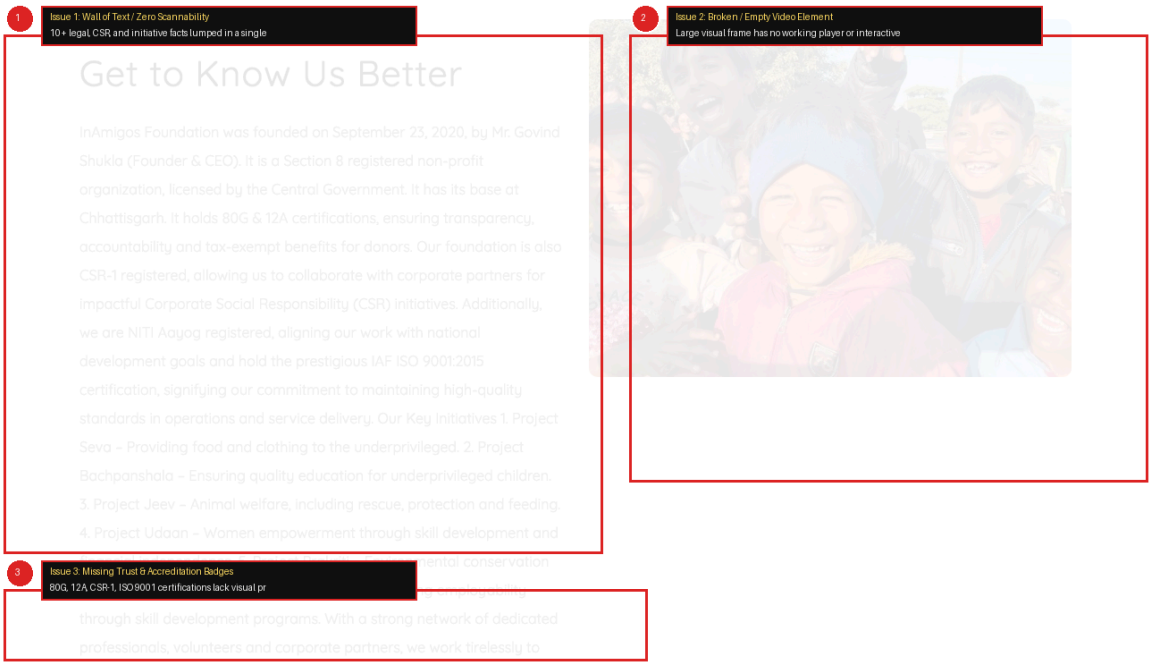

3. Annotated Section Analysis

3.1 Header Navigation & Hero Section

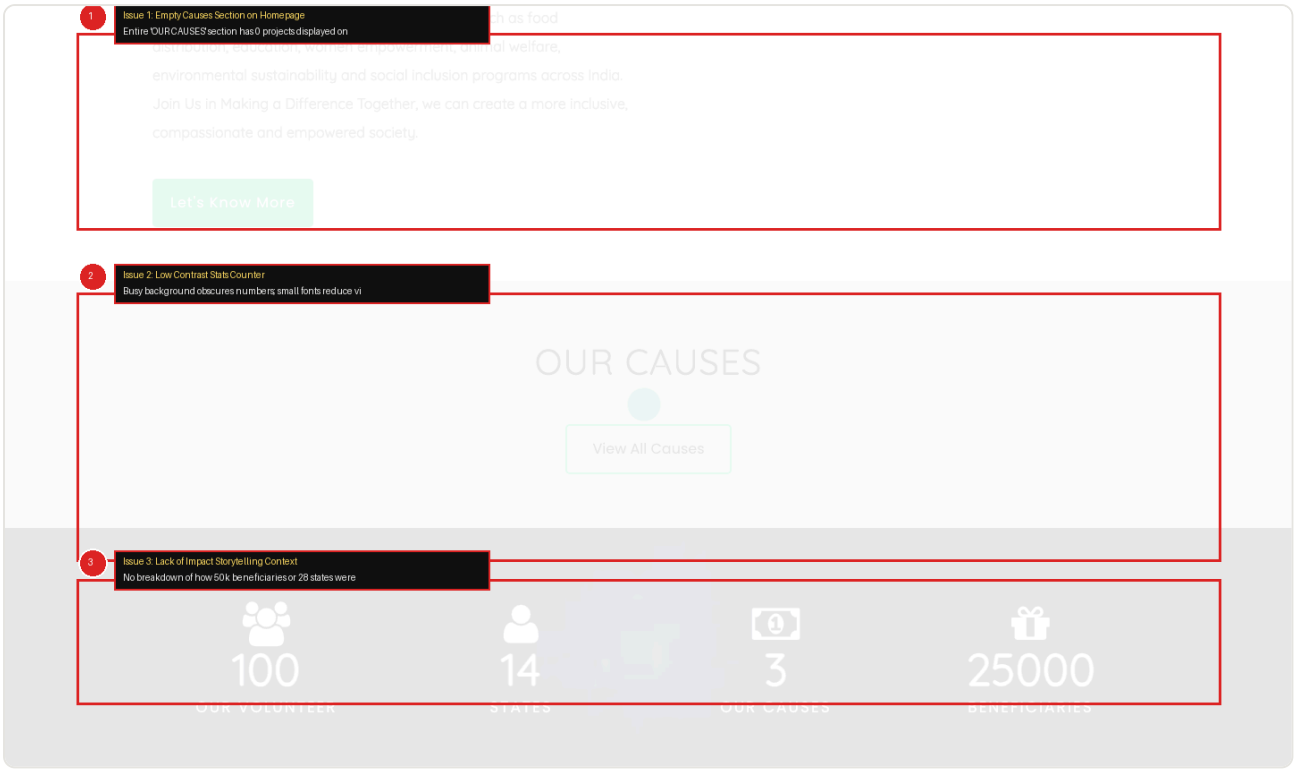

- **Issue 1: Placeholder Social Icons:** Top bar icons link to generic root domains (`twitter.com`, `google.com`, `pinterest.com`) instead of official InAmigos channels.
- **Issue 2: Uncropped Logo & Missing Persistent CTA:** Logo is a JPEG inside a white rectangle. Desktop navbar lacks a prominent "Donate" / "Get Involved" button.
- **Issue 3: Auto-Rotating Slider Usability:** Carousel slides shift automatically before users can read captions; text contrast over bright images is insufficient.
- **Issue 4: Monotone Feature Blocks:** Three identical neon green boxes abruptly push users away to external forms without pre-framing.

3.2 About Us Section & Information Density

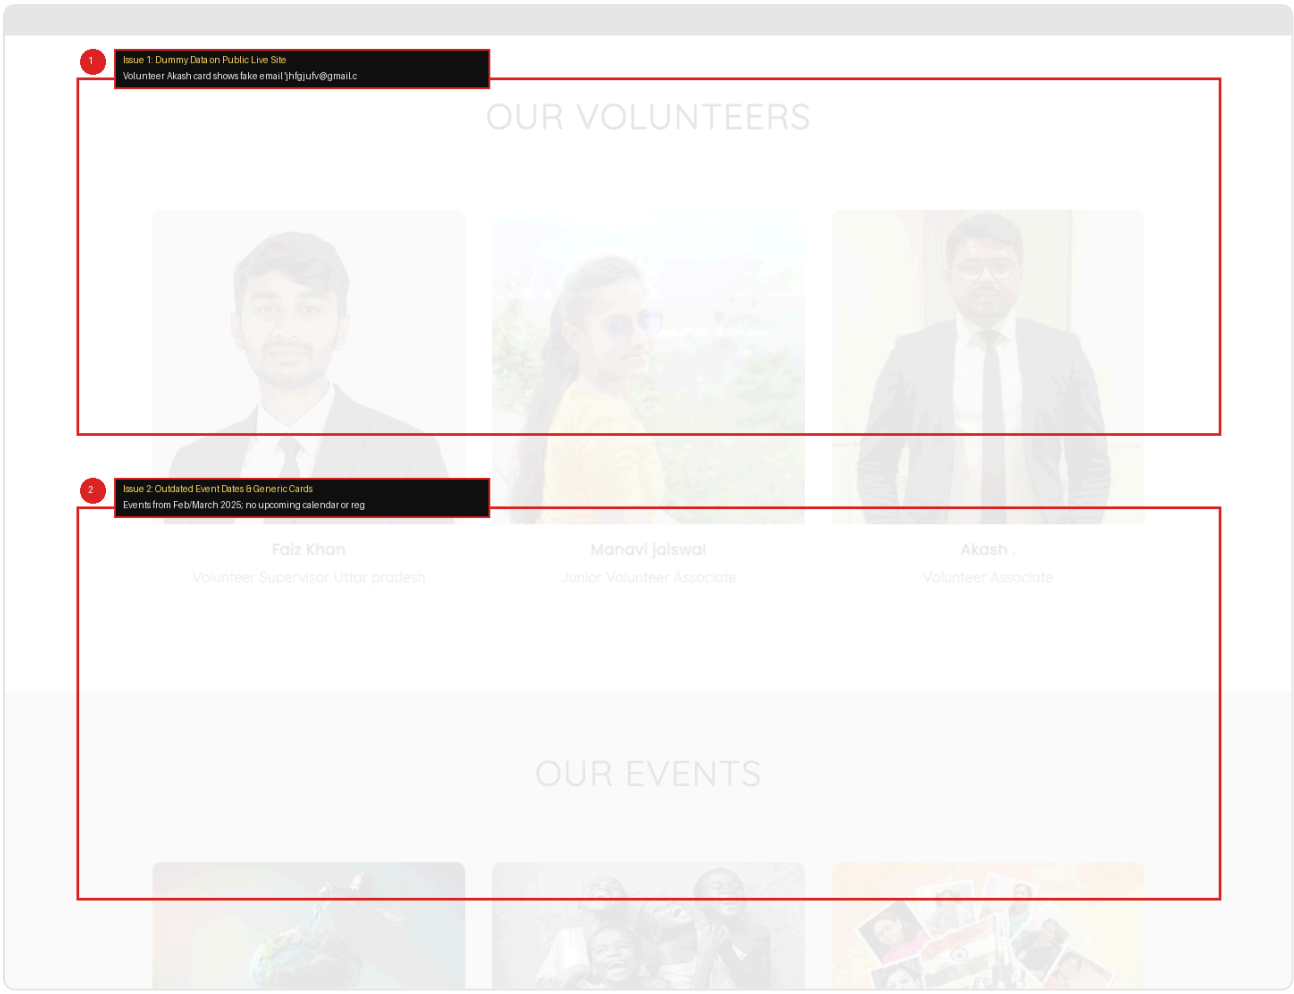

- **Issue 1: Wall-of-Text Copy:** A single continuous paragraph combines founding dates, legal registration, 80G/12A certificates, CSR-1, NITI Aayog, and all 6 projects without headings or lists.
- **Issue 2: Broken Video Frame:** Video play icon on right column has no functional modal or video stream attached.
- **Issue 3: Missing Credibility Badges:** Critical institutional achievements (ISO 9001:2015, NITI Aayog, 80G) lack visual badges for instant corporate CSR trust.

3.3 Causes (Empty State) & Impact Counter

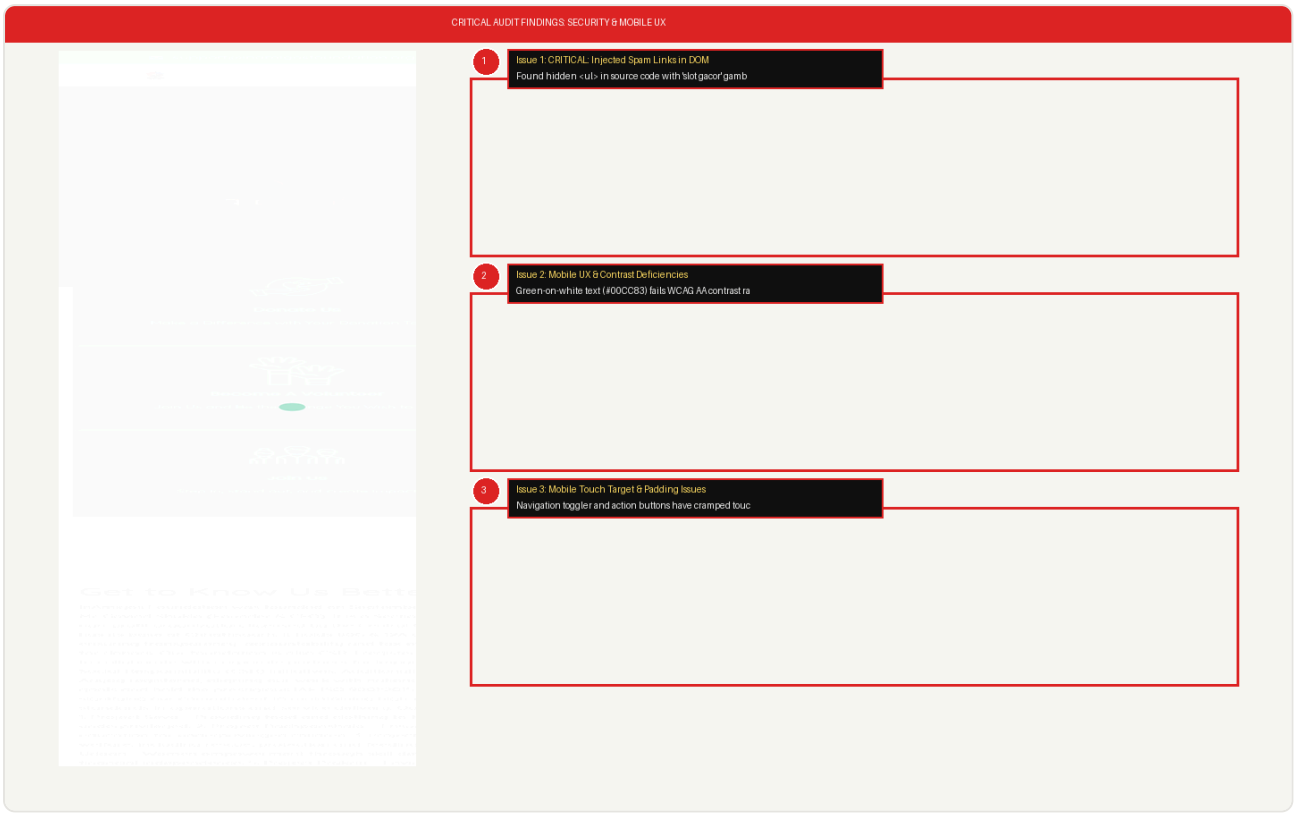

- **Issue 1: Empty Causes Grid:** The "OUR CAUSES" section on the live homepage displays zero cards, leaving a completely blank container followed only by a button.
- **Issue 2: Low-Contrast Stats Counter:** Numbers are superimposed directly on an un-dimmed photograph, degrading readability on standard displays.
- **Issue 3: Unsubstantiated Numbers:** Metrics like "50,000 Beneficiaries" lack context, geographical spread, or methodology breakdown.

3.4 Team Credibility & Event Timeliness

- **Issue 1: Dummy Placeholder Email on Public Site:** Volunteer Akash's profile card displays `jhfgjufv@gmail.com` on the live public site, harming professional trust.
- **Issue 2: Stale Events:** Event listings from early 2025 have no event status (Upcoming / Completed / Past Impact) or registration hooks.

3.5 Critical Security Defect & Mobile UX

CRITICAL SECURITY VULNERABILITY (P0): Injected Hidden Spam Links
Lines 9-43 of the live HTML contain hidden `<ul style="display:none">` elements linking to unauthorized external gambling and casino domains (*"slot gacor"*). This indicates a CMS compromise and creates an urgent risk of Google Search Console malware flags and blacklisting.

- **Accessibility Contrast Ratio Failure:** Brand green `#00CC83` text on white backgrounds fails WCAG 2.1 AA with a ratio of 2.2:1 (minimum 4.5:1 required).
- **Mobile Touch Dimensions:** Multiple buttons and interactive elements measure under 44px, causing touch tap inaccuracy on smartphones.

4. Prioritized Action Matrix

Priority	Area	Issue Description	Recommended Concrete Fix
P0 - IMMEDIATE	Security & SEO	Hidden spam/gambling links in DOM	Sanitize codebase, audit server/CMS plugins, update passwords, submit clean sitemap to Google Search Console.
P1 - HIGH	Homepage Causes	Empty causes container on homepage	Render all 6 initiatives (Seva, Bachpanshala, Jeev, Udaan, Prakriti, Vikas) with custom imagery, tags and concise blurbs.
P1 - HIGH	Content Scannability	Dense wall-of-text in About section	Split into an editorial layout: bold statement on left, structured metadata & certified badges on right with initiative tags.
P2 - MEDIUM	Visual Branding	Outdated template & harsh colors	Adopt modern design tokens: Plus Jakarta Sans / DM Sans, deep charcoal typography (#1A1917), restrained natural green (#2CA854).
P2 - MEDIUM	Conversion Flow	Raw offsite redirect to Razorpay/Google Forms	Implement an informative modal explaining 80G tax deductions, direct donation tiers, and dedicated volunteer onboarding.

5. Conclusion

InAmigos Foundation possesses all the genuine credentials, verified figures, and social dedication that donors and volunteers seek. By executing the recommended fixes outlined in this report—especially eliminating the hidden spam links, adopting an editorial design system, and structuring the content for scannability—the foundation's digital presence can match its high-caliber real-world impact.
